
Highlight first tab by default

Posted by Gene - 2014/10/06 04:51

Hello, how do I make it so that when the page loads the first tab is highlighted by default? Right now none of them are highlighted - you have to mouseover/click on the tabs first.

I'm fairly comfortable making code changes so feel free to explain how I can do this.

I'm running version 2.0 by the way.

Thank you,
Gene

Hello,

Set "Default panel index" parameter to 0 in plugin settings or add active="0" parameter to {tabs} tag.

Thank you - right now I have it set so the content in the first panel displays - which is fine, however, I'd like to have it so the first tab is highlighted to show that it's active, while the other tabs are a different color.

How do I accomplish this?

A screenshot is attached.

Thank you,
Gene http://www.ari-soft.com/images/fbfiles/images/smartcontent_plugin_screen.jpg

Could you provide a link to a page where the problem occurs? It can be a style conflict with 3rd party extension or site template.

The URL is webdev.fairwarning.com. You would need to enter "****" and then "****" at the prompts to order to view the page.

As an FYI, I have two other ARI modules on this page (one for a rotating panel, one for the top-level navigation menu.)

Also, when I installed ARI SmartContent there are other plugins which I did not enable, or publish - the only one enabled is the one for SmartContent. Could that possibly be the issue?

I am running Joomla 2.5.6.

Thank you,
Gene

Download and upgrade the component (including "Tabs" application). It should help.

I just downloaded and installed the latest version a couple of days ago - 2.1.4. Is there a different version I should be using? Or should I just uninstall this version and then reinstall it?

Please confirm, thanks.

Where can I download that version? I'm not seeing it anywhere on your site. I already paid \$35 for the 2.1.4 version this past Friday.

Thanks,
Gene
