
Pictures, links in tables

Posted by yum - 2008/11/24 23:42

1. Does this product allow my to place little pictures in table cells?
2. Does this product allow my to place hyperlinks in table cells?

Thank you...

Any table plugins in ARI Smart Content

ARI JCSV2Table plugin
ARI JDataTable
ARI JFlexGrid
ARI JTableSorter

Sure,

All these plugins allow to place pictures and hyperlinks inside table cells.

For ARI JDataTable, ARI JFlexGrid and ARI JTableSorter you may place image or hyperlink directly like the following according to plugin syntax:

Since ARI JCSV2Table plugin reads data from comma separated values file then hyperlink or image should be written there and it would be displayed.

Next thing, I tried this now and it do not work, right at the beginning you can see the picture in the table header and after rendering of ARIJ... the picture is away.

This is the code:

Hello,

We have fixed it. Please, download ARI Smart Content through 'Member Area'.

Regards,
ARI Soft
