
ARI Smart Content - Media Gallery - Pagination

Posted by ntm91307 - 2014/10/19 00:12

I have an article displaying inside SexyLightBox with an instance of Media Gallery which contains 12 images. Current design shows 3 pages of 4 miages each with Pagination below. Everything works fine (see images) but the dropdown for Display # doesn't seem to perform any function for me. I have setup pagination to display 3 pages of 4 images each and that's exactly what happens. The page labels are 1, 2 and 3 (respectively) which appears to be correctly displayed. But the Display # dropdown box will only display the #3...there are no other values.

Pretty convinced I'm missing some subtle piece here but haven't been able to work it out. I'd be ok if this control and label weren't there at all. I'm not going to be displaying so many images that some additional form of pagination will be required. The standard Top, Prev, Page#, Next, Bottom set will work just fine for me.

Any thoughts? <http://www.ari-soft.com/images/fbfiles/images/Gallery1.jpg>

Hello,

Could you provide a link to a page where we can see the problem?

Regards,
ARI Soft
