
Zoho Sheet plugin

Posted by adminbe - 2010/07/01 12:47

Am I right in thinking that we need to make our Zoho spreadsheet public before we can share via Joomla and ARI Smart Content? Or is there a way of viewing a private spreadsheet that is currently on the Zoho servers?

If so, what condition do I need to add to the syntax in the article plugin statement?

Regards

Hello,

The plugin can display only public spreadsheet.

Thank you for the prompt reply.

Are there any plans to allow the plugin to access private spreadsheets?

Regards

No, sorry, but Zoho service doesn't provide this possibility.

Ok

It is a shame, but not everything is possible.

Thank you
