

Sorting v2.2. Data Table causes rows to be dropped

Posted by CSSDAweb - 2014/12/16 01:38

I have this issues with a .csv file so I created one (attached) with 15 rows of identical date. When the 'Sort by' option for the CSV File is empty, all 15 rows are displayed, but when one of the column names (e.g. id) is entered in the Sort By field, only 9 rows of data are displayed. I need the file to be sorted when displayed. Any ideas/suggestion on how to get this working so that all rows are display when the Sort by option is used?

Hello,

Could you send screenshots of CSV file settings, data table module and the CSV file by email so we can investigate the problem?

Regards,
ARI Soft

Okay. I'm running Joomla 3.3.6 and v 2.2.3 of ARI Smart Content. What I've done is create a new setup to test the dropped rows problem. I left everything set to their defaults, except those items needed to configure a .csv file and have its content displayed via a data table module. The .csv file and screenshots for the .csv file, menu, and module setup are included in the attached .zip file. Also included are screenshots showing the results with and without 'Sort by' set to a field/column heading name. http://www.ari-soft.com/images/fbfiles/files/ARIconv_sortby.zip

The screenshot of CSV file settings doesn't contain all settings.

Regards,
ARI Soft

Here is a full screen shots with all of the fields shown for when setup with sort by sort by id (only 9 of 15 rows shown). The same set up applies when setup with sort by left blank (all 15 rows shown).

Here are the images in a .zip file since they are too big to upload as images. http://www.ari-soft.com/images/fbfiles/files/ARlcsv_sortby_141218.zip

Thank you. I've upgraded to v 2.2.4, and the display appears to be showing all rows, but when I try to edit the .csv set up I can't. It comes up with a bunch of code at the top of the page as shown in the attached image. <http://www.ari-soft.com/images/fbfiles/images/csvFileSetup141218a.jpg>

Okay, after downloading, and re-installing v2.2.4 again, everything appears to be working correctly.

Thank You!
