
CSS templates

Posted by nickc4555 - 2015/01/25 16:36

I have been using a CSS template created in ARI Smart Content successfully on a new development site, but for a reason I can't determine, datatable_jui.css and lightness.all.css are now loading on the last line in the head section, overriding the custom template.

Hello,

Use custom CSS rules with more weight. For example add BODY or HTML before CSS selector(s).

Regards,
ARI Soft

It was previously working, though. Before I edit all the css can you think of any reason why it might have stopped, please?

I have the same component on two other sites and don't have this problem.

Thanks for your help.

Where we can see the problem?

Regards,
ARI Soft

Could you specify what's wrong with styles?

Regards,
ARI Soft

These styles are being overridden:

```
.ui-widget-header {  
  background: none repeat scroll 0 0 rgba(0, 0, 0, 0);  
  border: 0;  
  color: #b8b8b8;  
  font-weight: normal;  
  padding-left: 15px;  
  padding-right: 15px;  
}
```

```
tr.even, tr.even TD {  
  background-color: #232427;  
}  
tr.odd, tr.odd TD {  
  background-color: #18191b;  
}
```

I have a suspicion the problem might have started when I installed hikashop.

Use the following CSS rules:

```
BODY .ui-widget-header {  
  background: none repeat scroll 0 0 rgba(0, 0, 0, 0);  
  border: 0;  
  color: #b8b8b8;  
  font-weight: normal;  
  padding-left: 15px;  
  padding-right: 15px;  
}
```

```
BODY tr.even, BODY tr.even TD {  
  background-color: #232427;  
}
```

```
BODY tr.odd, BODY tr.odd TD {  
  background-color: #18191b;  
}
```
