Tabs problem when url with parameters is used

Posted by stephanbeek - 2015/02/06 09:48

_____

When I make a very simple article in Joomla:
{tabs}
{tab title="First"}Content first tab{/tab}
{tab title="Second"}Content second tab{/tab}
{tab title="Third"}Content third tab{/tab}
{/tabs}
then a tabbed pages with 3 tabs appears normally.
Check with this link: http://www.vbb-bloemendaalseweg.nl/index.php/test2

But, if we add any parameter to this link then the tab page gets corrupt. The full content of the website is loaded in every tab on the page after 2 seconds.
Check with this link: http://www.vbb-bloemendaalseweg.nl/index.php/test2?ID=1
or any other link that adds a parameter to the first link.

Can you fix this? We need to use parameters and {tabs} should not go weird when we do :S

Regards.

_____

Hello,

This is jQueryUI issue. We have fixed it. Download and upgrade the extension (including "Tabs" application).

Regards,
ARI Soft
