
Error using Data Table Module in article

Posted by iaate - 2015/02/27 02:07

I have created a data source and a module to display some data in an article. The article has the following code:

```
{module Ari Smart Content DataTable Membership}
```

When I display the article I get the following error:

"ARI Smart Content - Data Table" module requires "ARI Smart Content - Data Table" library

It seems I need to enable something, please help,
Sid.

Hello,

Open "Extensions -> Extension Manager -> Manager" page on Joomla! backend, select "Library" value in "- Select type -" drop-down from filter section and check that "ARI Smart Content - DataTable" library is installed. The extension installs it be default with "ARI Smart Content - DataTable" module when it is selected during installation of the extension.

Regards,
ARI Soft

Thank you, I checked that and the library is enabled. But I get the same error.
Sid.

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft
