
Search window not visible

Posted by halumme - 2015/04/06 10:24

Hi,
Now after several tests with Datatable extension I notice having lost the search feature in the table. Although the SQL query part has been configured so that all columns are searchable, the front end does not allow searching (search window not present).
I may have inadvertently switched some parameter in a wrong way...

Any ideas?

Regards, Harri

Hello,

If you use "ARI Smart Content - Data Table" module, check that "Filter" parameter is set to "Yes".

Yes!!
I knew it was something very simple (if not very intuitive).

Thanks again,
Harri
