Problem making the module work

Posted by dodu.petrescu - 2015/05/25 11:47

_____

Hi

I can not make it work. It used to be fine on J 2.5 and now I can do it on J3.

Please help me creating an working example.
I can provide access.

Re:Problem making the module work

Posted by dodu.petrescu - 2015/05/25 12:02

_____

thank you so much!
Can i write the sql directly into the article without having to write modules for each querry?

ex:
{arijdatatable bPaginate="true"} {arisqltable} {arisqltablecolumns} {arisqltablecolumn id="functie" alias="Functie" className="idg"} {arisqltablecolumn id="nume" alias="Nume" headerClassName="head"} {arisqltablecolumn id="incad" alias="Incadrare " headerClassName="head"} {arisqltablecolumn id="disc" alias="Disciplina" headerClassName="head"} {arisqltablecolumn id="dept" alias="Departament" headerClassName="head"} {arisqltablecolumn alias="Virtual Column" headerClassName="head" virtual="true" pos="1"} {/arisqltablecolumn} {/arisqltablecolumns} {arisqltablequery} SELECT functie AS Functie, nume AS Nume, incad AS Incadrare , disc AS Disciplina, dept as Departament from table where disc like'Disciplina Biofizica%' {/arisqltablequery}{/arisqltable}{/arijdatatable}

_____

You can get a quote to include in the latest version "arisqltable" and a version "plugin" of gchart so as to make a cake to a table made with "arisqltable"?Ã¹

thanks

===

Re:Problem making the module work
Posted by admin - 2015/12/18 16:12
_____

Hello,

"ARI Smart Content - Data Table" and "ARI Smart Content - GCharts" are modules. They can be loaded into content with help of "ARI Smart Content - Load Module" plugin. "ARI Smart Content - Data Table" plugin is used to convert plain HTML tables into datatable. Documentation for the extension is available here.

Regards,
ARI Soft

_____

Hi my Order No. 17707, I am having problem in making this module to work. I have activated the module and initiated to connect to the joomla database (I am trying to show the content list in a module. I have already put in the sql code and subsequently activated the ari smart content data table plug in. Finally I created an article content list and put this code {arimodule id="96"}{/arimodule}. I also created a menu to see the result. It did not work on the code above appeared.

Pse help

Kind regards

===

_____

Hello,

Check that "System - ARI Smart Content - Load Module" plugin is installed and enabled.

Regards,
ARI Soft

===

Re:Problem making the module work
Posted by abuahassan - 2016/06/29 14:08

_____

Checked thru the plugin list only smart content - file loader is available. Where can I get the plug in smart content - load module?

regards

===

Re:Problem making the module work
Posted by admin - 2016/06/29 14:16

_____

When "ARI Smart Content" is installed, it is possible to select add-ons which will be installed (including "System - ARI Smart Content - Load Module" plugin). After installation the plugin will be available on "Extensions -> Manage - Manager" page on Joomla! backend.

Regards,
ARI Soft

Re:Problem making the module work
Posted by admin - 2016/12/13 06:24

_____

Hello,

What query do yo use? If enter only #__content, it doesn't make sense. For example if want to select id and title fields from #__content table then use the following query:

SELECT id, title FROM #__content

Regards,
ARI Soft

_____

Hello,
I grouped the id field, I need to show more fields from the smallest numbers.
Code:

```
SELECT
 C.id,
 C.user_id,
C.tc1,
C.tc2,
C.tc4,
C.tc5,
 CAT.avatar,
 B.username,
@curRank := @curRank + 1 AS Pozice
FROM
 #__chronoengine_chronoforms_datatable_treningove_casy C   INNER JOIN
#__jsn_users CAT ON C.user_id = CAT.id INNER JOIN
#__users B ON C.user_id = B.id
, (SELECT @curRank := 0) r
GROUP BY C.user_id
ORDER BY C.tc5 ASC
```

Re:Problem making the module work
Posted by admin - 2016/12/14 17:14

_____

Hello,

Could you explain in more details what do you want to show? When "GROUP BY" is used, only one record is selected according to "GROUP BY" filter. In your case only one record for each user will be selected, ORDER BY is applied by database after "GROUP BY" selection and it doesn't affect on "GROUP BY" selection.

Regards,
ARI Soft

===

Re:Problem making the module work
Posted by mkcup - 2016/12/14 17:23

_____

Thanks for the reply
I need GROUP BY 1 record of each user.
I need to record with the lowest value in the table NejlepÅ¡Ã- Cas;as
according to the image above

_____

Hello
I sent sql dump the tables on email

===

Re:Problem making the module work
Posted by admin - 2016/12/19 11:48
_____

The extension doesn't support ability to use temporary variables in query when "Server side pagination" is enabled. Your query will work if set "Server side pagination" parameter to "No" in module settings.

Regards,
ARI Soft

===

Re:Problem making the module work

_____

Hello,
thanks for the reply.
When I give to the server side pagination NO
the results do not appear as shown in Figure
does not function min (a.tc5) but a.tc5, but obtained results smallest http://www.ari-soft.com/images/fbfiles/images/capture_20161219_131333.png

===

Re:Problem making the module work
Posted by admin - 2016/12/19 12:54
_____

Add alias for min(a.tc5) column. It will look like:

SELECT a.tc1, a.tc4, min(a.tc5) AS min, a.tc2, b.avatar, c.username, @curRank := @curRank + 1 AS Rank
FROM
#__chronoengine_chronoforms_datatable_treningove_casy a INNER JOIN
#__jsn_users b ON a.user_id=b.id INNER JOIN
#__users c ON a.user_id=c.id , (SELECT @curRank := 0) r
WHERE a.tc2 LIKE 'MotokÃ¡ry Modrice'
GROUP BY a.user_id
ORDER BY a.tc5 ASC

Regards,
ARI Soft

_____

Super longer works,
but still ranks by a.id, I need to min (a.tc5) http://www.ari-soft.com/images/fbfiles/images/capture_20161219_141241.png

==

Re:Problem making the module work
Posted by admin - 2016/12/19 15:46
_____

Try the following query:

SELECT tc1,tc4,min,tc2,avatar,username,@curRank := @curRank + 1 AS Rank
FROM
(SELECT a.tc1, a.tc4, min(a.tc5) AS min, a.tc2, b.avatar, c.username, @curRank := @curRank + 1 AS Rank
FROM
sbhgl_chronoengine_chronoforms_datatable_treningove_casy a INNER JOIN
sbhgl_jsn_users b ON a.user_id=b.id INNER JOIN
sbhgl_users c ON a.user_id=c.id
WHERE a.tc2 LIKE 'MotokÃ¡ry Modrice'
GROUP BY a.user_id
ORDER BY min ASC) T, (SELECT @curRank := 0) r

Regards,
ARI Soft

==

Re:Problem making the module work
Posted by mkcup - 2016/12/19 16:15
_____

Thanks
I entered the new code
and does not even rank

http://www.ari-soft.com/images/fbfiles/images/capture_20161219_171140.png

==

Re:Problem making the module work
Posted by admin - 2016/12/19 16:35
_____

We can't reproduce this problem on our test server. The rank is shown fine:

http://www.ari-soft.com/images/fbfiles/images/rank.jpg

Regards,
ARI Soft

===

Re:Problem making the module work
Posted by mkcup - 2016/12/19 16:58

_____

Thanks for the reply
I do not know where the problem is
I had to move (SELECT @curRank = 0) r
Code:

```
SELECT tc1,tc4,min,tc2,avatar,username,@curRank := @curRank + 1 AS Rank
FROM
(SELECT a.tc1, a.tc4, min(a.tc5) AS min, a.tc2, b.avatar, c.username, @curRank := @curRank + 1 AS Rank
FROM
sbhgl_chronoengine_chronoforms_datatable_treningove_casy a INNER JOIN
sbhgl_jsn_users b ON a.user_id=b.id INNER JOIN
sbhgl_users c ON a.user_id=c.id, (SELECT @curRank := 0) r
WHERE a.tc2 LIKE 'MotokÃ¡ry Modrice'
GROUP BY a.user_id
ORDER BY min ASC) T
```

and now displays the rank of the picture

http://www.ari-soft.com/images/fbfiles/images/capture_20161219_175748.png

===

Re:Problem making the module work
Posted by mkcup - 2016/12/19 17:08

_____

I figured it out
@curRank := @curRank + 1 AS Rank must be +0
Code:

```
SELECT tc1,tc4,min,tc2,avatar,username,@curRank := @curRank + 1 AS Rank
FROM
(SELECT a.tc1, a.tc4, min(a.tc5) AS min, a.tc2, b.avatar, c.username, @curRank := @curRank + 0 AS Rank
FROM
sbhgl_chronoengine_chronoforms_datatable_treningove_casy a INNER JOIN
sbhgl_jsn_users b ON a.user_id=b.id INNER JOIN
sbhgl_users c ON a.user_id=c.id, (SELECT @curRank := 0) r
WHERE a.tc2 LIKE 'MotokÃ¡ry Modrice'
GROUP BY a.user_id
ORDER BY min ASC) T
```

now appears correctly thanks for great support http://www.ari-soft.com/images/fbfiles/images/capture_20161219_180801.png

==

Re:Problem making the module work
Posted by admin - 2016/12/22 10:30
_____

tc1 and tc4 fields are selected in "SELECT" query where "GROUP BY" is used. It selects one record per user according to "GROUP BY" condition. If an aggregate function is not used for a field in "SELECT" query, any value can be selected from record for a user. For example if you want to select MAX value for tc1 field, use MAX aggregate function. It will look like MAX(tc1) as max instead of tc1

Regards,
ARI Soft
