No Ari Smart Module Button on my Editor (JCE)

Posted by djsylt2015 - 2015/06/18 11:47

_____

Yesterday I bought the " ARI Smart Content Package ".
In Youtube I 've just followed the instructions until I came to the creation of an article and as search for the button " Ari Smart Module".

He will not, unfortunately, appear to me.
All plugins and modules are enabled .

What can I do now ?

Thank you for your help ...

_____

Hello,

Check that "Button - ARI Smart Content Module" and "System - ARI Smart Content - Load Module" plugins are installed and enabled.

Regards,
ARI Soft
