
Problems with jDataVisualizer

Posted by twarfield - 2010/07/18 17:03

See test page here:

<http://www.warfieldconsulting.com/chart-test.html>

In IE8, it loads fine the first time, but after page refresh the bars disappear:

<http://www.warfieldconsulting.com/jdatavisualizer-IE8-example01.png>

(same thing happens with Ari-Soft demo page, <http://smart.ari-soft.com/ari-jdata-visualizer.html>)

In FireFox, the bars are shifted:

<http://www.warfieldconsulting.com/jdatavisualizer-FF-example01.png>

What am I doing wrong?

PS ... looks perfect in Safari 8-) ...

Hello,

Download and upgrade 'ARI JData Visualizer' plugin, please. It should resolve problem in FireFox. We are investigating issue in IE 8 and provide solution soon.

Regards,
ARI Soft
