JTabView: How to change Themes

Posted by dietbox - 2010/07/20 12:02

_____

Hallo ARI-Team,

I didn't find information about how to choose one of the templates shown in your demo.

Thanks for help

_____

Hello,

Open 'ARI JQuery UI Loader' plugin settings page and choose appropriate theme in 'Default jQuery UI 1.5.2 theme' drop-down.

Regards,
ARI Soft

_____

Hello,

thanks a lot for your answer, but it provocates another question:
if I change themes with JQuery_UI_Loader, that obviously affects all implemented ARI-Content-Plugins??
So I can't use different ARI-themes in different articles???
If so, it would be highly recommendable to have the template-choosing as an Parameter in each component - would'nt it???

best regards

_____

Hello,

Currently only one theme can be active. The component provides ability to embed drop-down for selecting theme like on our demo site. We'll think about implementing possibility to use different themes.
