
Ari Smart Content - Data Table cannot select data

Posted by johnny@ejs.dk - 2016/05/19 18:53

I get this error:

Fatal error: Cannot use object of type stdClass as array in

C:\inetpub\websites\itilweb\staging.itilweb\plugins\system\arifancyboxanywhere\arifancyboxanywhere\kernel\Utils\class.Utils.php on line 28

Joomla fully updated and latest Smart Content

Hello,

Try to copy /administrator/components/com_arismartcontent/kernel/Utils/class.Utils.php file to /plugins/system/arifancyboxanywhere/arifancyboxanywhere/kernel/Utils folder. It should help.
