
Using the ARI Smart Content - Repeater

Posted by abuahassan - 2016/07/16 08:50

Hi,

My order No is 17707,

I have been reading thru your document for the above plug in, but I have not been able to start. I looked at the data source as listed under the component management tab, there is no mention of the -repeater.

The description of what the plug in does - is what I am looking for.

Can you give me the steps that are required for me to start trying this plug in?

Kind regards

=====

Hello,

Documentation for the plugin is here.

Regards,
ARI Soft
