## Showing pdf file and JPEG images in the data table
Posted by abuahassan - 2016/07/22 00:07

_____

Hello

My order no is 17707.

I have uploaded pdf files and JPEG images to joomla data tables. How can I display a downloadable PDF file and also display JPEG images in the table. Presently it is just displaying a link.

Kind regards

_____

Hello,

For example if you want to convert links to HTML hyperlinks from "Download" column, open data source settings page, populate "Columns settings -> ID" parameter with Download value (column name) and populate "Columns settings -> Format" parameter with the following value:

Download

_____

Hello,

Thank you for your response. I managed to do that but there is a Not found on this server, 404 error message.

Regards

_____

Check that correct links are stored in database (CSV file).

Regards,
ARI Soft

_____

The links that I want is actually in the joomla data base table. I would like the user to be able to download the data stored in Mysql database. This table stores files and images from a column. Shouldn't I be using the link to this column in the table? and if so where can I get it and where should i put it in the code? I am not sure whether I ma on the right track.

Kind regards

_____

We suppose not a complete links are stored in a database and it requires to add path folder(s) where files are located. Could you provide a link to a page with the table and specify path to folder where files are located?

Regards,
ARI Soft

_____

I have this link to a file:

/home/mataccom/public_html/media/breezingforms/uploads/Test.pdf

Now where in the code can I put this link?

Kind regards

_____

Use the following value for "Columns settings -> Format" parameter:

Download

_____

Thank you again for your response

Now it gives this error

You don't have permission to access /media/breezingforms/uploads/Test.pdf on this server.
Additionally, a 403 Forbidden error was encountered while trying to use an ErrorDocument to handle the request.

Kind regards

_____

This is not "ARI Smart Content" issue. This is a problem with configuration of security rules on your server. Check

.htaccess file or contact your site administrator or hosting support for more details.

_____

Hi,

Sorry to bother you again. I am actually very happy to use the Ari smart content table. So I am pursuing this not using any other extension.

I would like to display the pdf files that I have uploaded in the Joomla's media manager. For this example the link will be images/Pdf/Test.pdf

This link will upload a pdf file "Test" from media manager, so how can I do the same in the column of the table displayed by Ari smart content table?

Kind regards

_____

Hello,

The extension can show data from database and CSV files and show image galleries for photos from local folders (or from Flickr or Picasa services). It doesn't support ability to show PDF files from specific folder(s) on your server.

Regards,
ARI Soft
