
Ari Smartcontent - Data Table - Theme selection ?

Posted by johnny@ejs.dk - 2016/08/24 07:14

Fresh installed Joomla 3.6 and Ari Smartcontent ARI Smart Content v. 2.2.29

When I select Theme i get the wierd list from picture - and no matter what I select the Theme does not work.

Sincerely

Hello,

We checked it in Joomla! 3.6.2 with "ARI Smart Content" 2.2.29 and everything works fine. Could you provide a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

I have tried to reproduce the issue, at my external site and the issue does not appear there.

It seems to me, that the problem is related to Joomla 3.6.x when running on top of IIS7 - i have some other issues with storage driver and Cache settings after upgrade to Joomla 3.6.2

The test i made external (apache) had no issues but when i copied the testsite over to my internal IIS the issue appeared again.

I will investigate more into it, and report my findings.

Johnny Ejs
