Using TAB

Posted by Laurent Zotto - 2016/09/05 06:03

_____

Hello

What must I add or define in my Joomla template that the style is applied to the module "ARI Smart Content - Tabs".

Thank you in advance
Best regards
Laurent Zotto

_____

Hello,

It is not possible. Joomla! doesn't provide any standards to define tabs styles and layout.

Default theme for "ARI Smart Content - Tabs" plugin can be selected in "Theme" drop-down in plugin settings.

Regards,
ARI Soft

_____

On the web site it states that it is possible to create a new theme!
how

See on:
http://smart.ari-soft.com/joomla-tabs.html

The extension supports jQuery UI themes. It is possible to select from over 20 pre-installed themes or create new themes. Use "Choose a theme" drop-down above the tabs to select an active theme.

_____

I red a bit deeper on the page and I saw how to get my theme created.

Thank you B)
