
numbering rows

Posted by kominfo - 2017/03/14 10:53

how to setting ari soft content for numbering rows..step by step please...

id,name
7,eka
4,maya
6,jack

i want like this
no,id,name
1,7,eka
2,4,maya
3,6,jack

Hello,

Currently the extension doesn't support this ability.

BTW, If you show data from a database, it is possible to numbering rows in SQL query and numbers in a table.

It is possible to use this solution. A sample query:

```
SELECT
  @rownum := @rownum + 1 AS rank,
  id,
  title
FROM
  #__content,
  (SELECT @rownum := 0) R
```
