
Fatal error: require_once() ... datatable.php

Posted by HeinzP - 2017/07/31 09:26

I'm trying to implement a Joomla Module created with AriSoft Smart Content Datatable in a website but I'm getting an error like this:

Fatal error: require_once() : Failed opening required
'/home/esk18rie/www/xxxxx.ch/libraries/arismartcontent/htmltable/htmltable.php' (include_path='.:usr/local/share/pear')
in /home/esk18rie/www/xxxxx.ch/libraries/arismartcontent/datatable/datatable.php on line 16

Maybe I did something wrong with the installation? But I tried to do it the same way like the usage in another website where it works excellent!?

Thanks for any help.
Heinz

Hello,

Could you provide a link to a page where the problem occurs and a temporary access to your J! backend by email so we can investigate the problem?

Regards,
ARI Soft

:)
Thank you very much for your great and prompt support!

Best regards,
Heinz

PS
Ticket can be closed - Installation of "ARI Smart Content - HTML Table" solved my issue!
