
Number of licenses you may generate is exhausted

Posted by dodu.petrescu - 2010/08/06 08:50

Hi,

I think I did something wrong regarding the licenses. I need one testing license for testweb.umf.ro and one license for umf.ro

The production site is on umf.ro but the testing site is on testweb.umf.ro How can I create a license also for the testweb subdomain.

It worked but it expired and now it says "Number of licenses you may generate is exhausted" .

Thank you
