
Installation Issue DataTable Pack v. 1.7.5

Posted by Iselbach - 2010/08/06 14:42

Hello everybody,
Thanks for the great extension.
I've just made the download and tried to install on customer's website.
After install, takes a while and comes back blank screen with no component installation.

Domain www.premiumcorporate.com.br
Joomla 1.5.18
MySQL 4.0.27
PHP 5.1.6 (more info at <http://www.premiumcorporate.com.br/versao.php>)

I installed on localhost and worked out.

Is it MySQL version?

Thanks and best regards.
Lucas

Hello,

It can be problem with some PHP settings. Install PHP Settings plugin, enable it and try to install the component again, please, or try to install the component from directory, for this upload component installation package to your server, unzip it and use 'Install from Directory -> Install directory' option on Joomla! installation page. If it doesn't help or you have any difficulties with it you can provide temporary access to your Joomla! backend by email and we'll help you.

Regards,
ARI Soft

Hi Guys,
Now I have this error message:

(wait for instructions).

Cheers
Lucas

Hello,

Sorry for delay. What version of MySQL you use? The component requires MySQL v. 4.1.0+

Regards,
ARI Soft

Re:Installation Issue DataTable Pack v. 1.7.5

Posted by Iselbach - 2010/08/11 01:56

Check previous posts.
It's 4.0.27

I'm requesting to provider to update the MySQL.
Let's see what I can get.
Cheers
Lucas

Posted by admin - 2010/08/11 04:54

Sorry that we have missed information about MySQL version from previous post. In any case, we recommended to update MySQL because MySQL Server versions before MySQL 5.0 are no longer supported. This information can be found on official MySQL site.

Regards,
ARI Soft

Posted by Iselbach - 2010/08/11 17:03

Hi guys,
I'm having problems with the provider.

Can you send me an earlier version of Smart Content Data Table which works with MySQL 4.0.27?

Thanks
Lucas

Hello,

Sorry, but the component has worked with MySQL 4.1+ since the first version.

Regards,
ARI Soft

OK, so.
I'm looking for a workaround, because my client don't want to change the provider.
I'll keep in touch.
Cheers
Lucas
