## Table theme

Posted by imaya - 2010/08/10 17:01

---

Unfortunately the information is very limited on this component. I am able to load the .csv file but how do I change the theme? You can see a test site at <http://macguide.net/>

The code used in the article is:

```
{arijdatatable}
{aricsvtable file="/home/macguide/public_html/data/data.csv"}
  {aricsvtablecolumns}
    {aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}
    {aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"}
    {aricsvtablecolumn alias="Virtual Column" headerClassName="head" virtual="true" pos="1"}
    {coltemplate}{$NAME} - {$ID}/{coltemplate}
  {/aricsvtablecolumn}
{/aricsvtablecolumns}
{/aricsvtable}
{/arijdatatable}
```

Thank you!

Hello,

That use jQuery UI themes with 'ARI JDataTable' plugin, open 'ARI JDataTable' plugin settings page, set 'Using jQuery UI themes' option to 'Yes'. Then open 'ARI JQuery UI Loader' plugin settings page and choose appropriate theme in 'Default jQuery UI 1.7.2 theme' drop-down.

Regards,
