
How to change font size for a smart content table

Posted by HeinzP - 2018/03/26 18:39

Hi there,

I would like to change an implemented ARI Smart Content table from existing font size to a new one, a smaller one. How can I change this for the whole table? Trying to use a class suffix and a font-size definition in the CSS file was not successful!

Example-Page:

<http://fgsm-gridbox2.fgsm.ch/frauen>

Thanks for any hint!

Best regards,
Heinz

Hello,

Add the following CSS rules "CSS Styles" parameter in module settings:

TABLE.dataTable, TABLE.dataTable TH DIV {font-size:10px;}

Regards,
ARI Soft

Thank you very much for your great support! This was very helpful!

Unfortunately I did not find the parameters for the header and the footer of the table. Could you please let me know which elements I have to add to the CSS code?

Thanks again.

Use the following CSS rule:

.dataTables_wrapper .fg-toolbar * { font-size: 10px; }
