problem with layout on iphone but not on samsung

Posted by HeinzP - 2018/03/26 18:51
_____

Hi there,

No idea if it is an issue on your side?

Showing a Smart Content Table on an iPhone and on a Samsung SmartPhone end with differt Layouts and I cannot find any reason why. Table style must come from the file: arismartcontent/datatable/css/datatable_jui.css

Would you have any proposal to solve the problem?

Thanks a lot and best regards,
Heinz

_____

Hello,

This problem with the following CSS rule from /templates/gridbox/css/storage/responsive.css file:

body {
    word-break: break-word;
}

Regards,
ARI Soft
