
3D Chart: Undefined property

Posted by dietbox - 2010/08/17 05:21

Hi ARI-Team,

since I have installed 3D Chart (installed, but still not used) I get the error notice:

Notice: Undefined property: Ari3DGraphPlugin::\$_idList in
/homepages/14/d34588301/htdocs/joomla/plugins/content/arismartcontent/content/ari_3d_graph4c5a753841ac6/ari3dgra
ph.php on line 124

and different things like RSS-Feed, Help-Site (Kunena-Forum) etc don't work correctly.
Any ideas on what could be the reason??

regards
