
Smart Content - Sexy Lightbox

Posted by stefan@icelink.is - 2018/10/01 20:05

Hi

Is it possible to open the Sexy Lightbox without the need to have the user click the button ("Show web page").
I want to have the lightbox automatically open when an article (which includes the line below) is opened from a menu.

{sexybox url="http://somewebpage" width="90%" height="90%"}Show web page{/sexybox}

Best regards,
Stefan

Hello,

The plugin doesn't support this ability.

Regards,
ARI Soft
