
How to enable auto size?

Posted by Marsm - 2018/10/03 13:14

Hello,

I want to enable auto size for table width (in Database data - sql query). How or where to enable auto size?

Regards,
Marsm

Hello,

Could you describe in more details what auto size you need? Probably you can provide an image?

In your manual I read:

Width this property is used by table applications (Datatable, HTML table and etc.) to define column width. This value can be ignored by applications depends on their configuration (for example auto size is enabled). Possible values: 100px, 15% and etc. http://www.ari-soft.com/images/fbfiles/images/Screenshot_SQL_query.png

Populate it with auto value.
