
SQL Table plugin don't install

Posted by Iselbach - 2010/08/18 13:18

Hi,
I finally changed the ISP Provider to a updated MYSQL one.

Then I installed ARI Smart Content: Data table pack.

Then I'm trying to make a query to a specific table in Database.
I figured out that the only way to do that is throug ARI SQL Table. Then I tried to install the plugin. Open plugins option, Search & Install, select ARI SQL Table, install but nothing happens. I checked the FTP and the folder install/plugins/ isn't there.

So I have these questions:

1. where are the other plugins? (I searched the entire ARI site and couldn't find them to download, pls send me the link)
2. What are the possible ways to open a single table in database and create a query to view it?
3. Is there any dummy-proof tutorial to learn how to use all the power of ARI Smart Content? I'm having some difficult to learn your teachings.

Thanks and best regards.
Lucas

Hello,

'ARI SQL Table' plugin installed by default with 'ARI Smart Content: DataTable Pack' like other extension plugins. You can see installed plugins on 'Components -> ARI Smart Content -> Plugins' page or on 'Diagnostics' page. 'ARI SQL Table' plugin can be wrapped with other table plugins, for example with 'ARI JDataTable' plugin. See below sample code which select records from jos_content table and wrap it with 'ARI JDataTable':

```
{arijdatatable}  
{arisqltable}  
  {arisqltablequery}  
    SELECT *  
    FROM #__content  
  {/arisqltablequery}  
{/arisqltable}  
{/arijdatatable}
```

Sample of usage of each plugin can be found on plugin settings page and on our demo site.

Regards,
ARI Soft

Re:SQL Table plugin don't install

Posted by Iselbach - 2010/08/18 22:50

Ok,
Let's go again.
I checked the DIAGNOSTICS page, PLUGIN tab.

Here it is (translated):

Nome	Tipo	Status
ARI CSV Table	content	Instalado
ARI JTruncator	content	Instalado
ARI JDataTable	content	Instalado
ARI MooTable	content	Instalado
ARI JTableSorter	content	Instalado
ARI JFlexGrid	content	Instalado
ARI CSS Templates Loader	content	Instalado
ARI JCSV 2 Table	content	Instalado
ARI Linkifier	content	Instalado
ARI SQL Table	content	Instalado
ARI IE Canvas Loader	system	Instalado
ARI JQuery UI Loader	system	Instalado
ARI Mootools Loader	system	Instalado
ARI JQuery Loader	system	Instalado
ARI System	system	Instalado

So the Ari SQL Table is installed inside JData Table?

I just copied and paste your code and didn't worked out.
So the SQL Table plugin is not installed? Or it is not working?

Any hint?

Any other plugin can open a table in the database?
(I used chronoforms extension to creat table jos_chronoforms_cvnovo and need to open this table and browse results).

best regards
Lucas

Hi,
Finally I got it.
I need to insert the code inside the CODE button in the editor (I use JCE).
So now it's working.

I'm just having some difficulties with CSS formatting.
Any help?

Cheers
Lucas

Re:SQL Table plugin don't install

Posted by Iselbach - 2010/08/19 13:52

When I open the Component, menu CSS Templates, No Records Found.

When I go to diagnostics / System / Joomla Content Plugin --> Not installed or installed with errors (already tried to fix many times, tried to follow instructions but directory is missing).

Tried with this code:

(worked first time, now isn't working. At the first time, the table has no formatting, was ugly, now it doesn't appear)

```
{aristable}
{aristablequery}
{aristablecolumns}
{aristablecolumn id="Nome" alias="Nome" width="20%" className="idg"}
{aristablecolumn id="Endereco" alias="Endereco" headerClassName="head"}
{aristablecolumn id="cidade" alias="cidade" headerClassName="head"}
{aristablecolumn id="uf" alias="uf" headerClassName="head"}
{aristablecolumn id="cep" alias="cep" headerClassName="head"}
{aristablecolumn alias="Virtual Column" headerClassName="head" virtual="true" pos="1"}
```

```
{coltemplate}{$Nome} - {$Endereco} - {$cidade} - {$uf} - {$cep}{/coltemplate}
```

```
{/aristablecolumn}
{/aristablecolumns}
```

```
SELECT Nome, endereco, cidade, uf, cep, fones
FROM jos_chronoforms_cvnovo
```

```
{/aristablequery}
```

```
{/aristable}
```

Then tried the second option and doesn't read table
(see image attached)

```
{aristablequery}
```

```
SELECT Nome as Nome, endereco as Endereco, cidade as cidade, uf as uf, cep as cep, fones as fones
FROM jos_chronoforms_cvnovo
```

```
{aristablesorter defaultSorting="1:DESC" zebra="TRUE"}
```

Nome
Endereco
cidade
UF
CEP

Nome
Endereco
cidade
uf
cep

```
{/aristablequery}
```

{/arjtablesorter}

I realize that I need to open Joomla Editor for Article editing (I'm using JCE 1.5.6), then click on Edit Code, then Select Code then paste the code to try. Is it correct?

Please help me.

Thanks. http://www.ari-soft.com/images/fbfiles/images/results_ari2.jpg

Re:SQL Table plugin don't install

Posted by admin - 2010/08/20 12:04

Hello,

You can create your own CSS templates in 'CSS Templates' section. If you don't create CSS templates, this section will be empty. Regarding your code, {arjsqltablequery} tag can be used only inside {arjsqltable} tag. If you want to wrap 'ARI SQL Table' plugin with 'ARI JTable Sorter' plugin, use the next code:

```
{arjtablesorter defaultSorting="1:DESC" zebra="TRUE"}
{arjsqltable}
  {arjsqltablequery}
  SELECT Nome as Nome, endereco as Endereco, cidade as cidade, uf as uf, cep as cep, fones as fones
  FROM jos_chronoforms_cvnovo
  {/arjsqltablequery}
{/arjsqltable}
{/arjtablesorter}
```

If you want to wrap HTML table with 'ARI JTable Sorter' plugin, use the following code:

```
{arjtablesorter defaultSorting="1:DESC" zebra="TRUE"}
```

```
Nome
Endereco
cidade
UF
CEP
```

```
Nome
Endereco
cidade
uf
cep
```

{/arjtablesorter}

Hi,
The first code generated this result
<http://premiumcorporate.com.br/images/ari-result1.jpg>

The second code generated this result.
<http://premiumcorporate.com.br/images/ari-result2.jpg>

And still have that problem in diagnostics.

Could you provide temporary access to your Joomla! backend by email and say link to page where we can see this issues. It helps resolve these problems in the shortest period of time.

Re:SQL Table plugin don't install

Posted by admin - 2010/08/22 08:05

We have inserted the first code and it works. Only one note, jos_chronoforms_cvno table doesn't contain any record so the plugin doesn't show anything.

Re:SQL Table plugin don't install

Posted by Iselbach - 2010/08/22 14:52

oops,
sorry about that.
While testing, I left database blank so admin can fill with right data.

Now I'm going to put all the fields together in the same table.
Is there any way to do it VERTICALLY instead of HORIZONTALLY?

Cheers
Lucas

Re:SQL Table plugin don't install

Posted by admin - 2010/08/22 15:11

Unfortunately no, SQL and the plugin doesn't provide this ability.

Re:SQL Table plugin don't install

Posted by Iselbach - 2010/08/25 21:34

Hi Guys,
I'm almost there.

Now I've tried a new code and it's working fine, but I can't make it nice.

How to put some CSS style on it?

I tried to put in the template tdefault.css and also in the CSS Template menu of Ari-Smart.

Then I used inside the code but none worked out.

Can u help me pls?

Attached img with results.
You already have access to admin if you need.

Thanks and cheers.

Hello,

Could you explain what plugin you use (ARI SQL Table or ARI jTable or another) and what CSS styles you want to apply?

Regards,
ARI Soft

Re:SQL Table plugin don't install

Posted by Iselbach - 2010/08/26 16:43

Hi,
This is the code:

```
{aristable header="TRUE" cellPadding="2"}
{aristablecolumns}

{aristablecolumn id="nome" alias="nome" className="contentheading"}
{aristablecolumn id="endereco" alias="endereco" className="contentdescription"}
{aristablecolumn id="Cidade" alias="Cidade" className="contentdescription"}
{aristablecolumn id="UF" alias="UF" className="contentdescription"}
{aristablecolumn id="CEP" alias="CEP" className="contentdescription"}

{/aristablecolumn}
{/aristablecolumns}
{aristablequery}
```

```
SELECT nome AS nome,
endereco as endereco,
cidade as Cidade,
```

uf as UF,
cep as CEP

FROM jos_chronoforms_cvnovo

{/arisqltablequery}

{/arisqltable}

You have access to the site. Please check inside if there is any mistake.
Thanks

Re:SQL Table plugin don't install

Posted by Iselbach - 2010/08/27 19:30

Hi
I think that the style SMOOTHNESS in the page
<http://smart.ari-soft.com/ari-jdatatable.html>

would be great.
Thanks
Lucas
