
French language

Posted by Parlure - 2019/01/20 16:52

Hello everyone,

Is there some french translation available for ARI Smart Content and ARI Smart Book ?

If not then I can use the existing .ini files, translate them and save them in theFR_fr type file? Will Joomla recognized them automatically?

Thanks for your time.

Hello,

Sorry, but we don't have a French translation for these extensions. The extensions use INI file so a new translation can be easily added. You can read here [how to add a new translation](#).

Regards,
ARI Soft
