
MooTable Show/Hide Column Feature Issues

Posted by cantilever - 2010/08/20 02:06

I'm currently using the MooTable plugin and am experiencing trouble using the show/hide column feature. When I attempt to use the show/hide column drop down option, several of my column names and their corresponding check boxes are hidden behind the grid of the cells and I am unable to select or unselect them. This is occurring in Firefox, Chrome, and IE. What is the solution to this issue?

Hello,

Sorry for the delay. Could you provide link to page where we can see this issue?

Regards,
ARI Soft

Create CSS template in 'CSS Templates' section on the component backend with the next code:

```
body .mootable .thead
{
  z-index: 99;
}

body .mootable .displayOptions
{
  z-index: 100;
}

body .mootable .tbody
{
  z-index: 10;
}
```

PS: Don't forget to enable template.

Regards,
ARI Soft
