Adjust Responsive Layout for Chrome

Posted by rusasadmins - 2019/05/15 14:24
_____

When I use the chrome browser, and 'shrink the page' manually, the content doesn't 'wrap' very well. I understand this could be because of my template, but I wasn't sure if there was a setting in the tool that I could adjust.

In 'developer tools' on safari, it works perfectly...

On my actual CELL PHONE it works perfect (droid)

But when I manually 'shrink' the page it doesn't... http://www.ari-soft.com/images/fbfiles/images/Screen_Shot_2019_05_15_at_10.png

Hello,

Could you provide a link to a page where the problem occurs? We can't investigate this problem by a screenshot.

Regards,
ARI Sot

I have a feeling it's my 'template' that is messing this up. Good news on an actual cell phone, it looks perfect!

thanks,
Laura
