Hello,

in the ARI Smart Content Data Table module, I use simple paging mode with pagination 50,100,250,500.

But on my site shows 10,25,50,100, what ever I try:

How do I get the pagination working?

Regards

Hello,

Could you send screenshot(s) of module settings page by email or provide a temporary access to your J! backend so we can investigate the problem?
