
ARI JFancyBox and linked content

Posted by stesod - 2010/09/06 13:50

Hi!

In the discription of ARI JFancyBox it says that it is used for displaying image(s) "or any content".

I canÖ't manage to display an article without header and footer. I want to show only the article content without header, links and footer.

I tested Modalizer with FancyBox and it gives the desired effect but without css :(
So I turned to ARISoft and bought Smart Content now it still donÖ't work after trying it.

I tested a complimentary plug called Linkr but the link generated still comes with header and footer.

cheers/Tfan

Hello,

Could you provide plugin code which you use?

Regards,
ARI Soft

```
{arijfancybox url= index.php?option=com_content&view=article&catid=2:medlemsservice&id=22:hemhjaelp}  
{/arijfancybox}
```

or this

```
{arijfancybox url="index.php?option=com_content&view=article&catid=2:medlemsservice&id=22:hemhjaelp&Itemid=17"}  
{/arijfancybox}
```

Try to use the following code:

```
{arijfancybox url="index.php?option=com_content&view=article&id=22&tmpl=component"}Show article 1{/arijfancybox}
```

Regards,
ARI Soft

Grate it works!

But how can I get css formatted text in the article?
I mean can I have the article remain linked to its default template? ;)

Could you provide links to pages where we can see an article in the lightbox and with default template?

Regards,
ARI Soft

<http://paviljongen-limhamn.se/medlemsservice.html>

And it's the picture down in the right corner "Hemhjalp"

Stuck!

Ooops, it doesn't work!!

Followed the instructions but still there is no template connection ie no css.

Please help, a bit desperate : |

Cheers/Stephan

Thanks again!

This is the best support and value for a extension expens I experienced so far.
Fast respons and helpful!

Awesome :)

I want to recommend ARISoft to the hole joomla community!

Cheers/Stephan :)
