
Data Table

Posted by joecurtis - 2010/09/06 20:59

When I try to use arijdatatable there is a vast gap between the page heading and the table itself and also the table text is right justified.

Presumably both are set by css. Where can I find the css file to alter?

Hello,

CSS file for 'ARI JDataTable' plugin is located by the following path:

/plugins/content/arismartcontent/content/ari_jdatatable/media/css/datatable.css

or

/plugins/content/arismartcontent/content/ari_jdatatable/media/css/datatable_jui.css

If support of 'jQuery UI Theme' is enabled.

PS: If you provide link to page where we can see this issue we can help to resolve it.

Regards,
ARI Soft

This isn't the plugin problem. This problem with site template styles. Add the next CSS rule that fix it:

```
#main
{
  overflow: hidden;
}
```

Regards,

ARI Soft

Many thanks for your prompt response - the issue is now resolved.
I think I will spend more time reading the forum as a lot of issues seem to be covered there together with documentation that is not covered on the rest of the site.
