
JTableSorter with SQL Table

Posted by rag - 2010/09/18 18:37

Hi,
i can't make it combine this 2 modules could you give me a code example how to combine them.
this works perfect :

```
{aristable}

{aristableconnectionstring dbHost="localhost" dbUser="xxx_test2" dbPass="xxx" dbName="xxx_test2" dbType="mysql"}
{aristablecolumns}
{aristablecolumn id="ID" alias="ID" width="20%" className="idg"}
{aristablecolumn id="NAME" alias="UserName" headerClassName="head"}
{/aristablecolumns}
{aristablequery}
SELECT id AS ID,name AS NAME
FROM jos_vathmologia
{/aristablequery}
{/aristable}
but i want it inside of a nice table layout,
thanks in advance
```

Hello,

Use the following code:

```
{aristablesorter}
{aristable}
{aristableconnectionstring dbHost="localhost" dbUser="xxx_test2" dbPass="xxx" dbName="xxx_test2" dbType="mysql"}
{aristablecolumns}
{aristablecolumn id="ID" alias="ID" width="20%" className="idg"}
{aristablecolumn id="NAME" alias="UserName" headerClassName="head"}
{/aristablecolumns}
{aristablequery}
SELECT id AS ID,name AS NAME
FROM jos_vathmologia
{/aristablequery}
{/aristable}
{/aristablesorter}
```

Regards,
ARI Soft
