Wrapping CSV around JDataTable

Posted by webunderdog - 2010/09/21 04:23

_____

I'm having a hard time trying to get the UI themes working - CSV Table wrapped by ARI JData Table to add sorting and filtering...

I've read through the forums, applied changes and still nothing.

Please help. Will provide backend details if needed.

Hello,

Provide temporary access to your Joomla! backend by email that we can investigate this issue and provide solution.

Regards,
ARI Soft

_____

Try now, please. It was a conflict with 'SuperFish Menu' because it uses jQuery javascript framework and 'ARI JDataTable' plugin uses it too and 'SuperFish Menu' javascript includes remove necessary includes of 'ARI JDataTable' plugin. We installed 'System - ARI Smart Content' plugin instead of 'ARI Smart Content' content plugin and now it works fine.

Regards,
ARI Soft
