Search content

Posted by rima - 2009/01/08 09:02

_____

I have a question but dont know if it possible.

I would like to just show a search box, so users can search 'zipcode region' and after that the results will be shown 'name, address etc.' But the 'zipcode region' shouldnt be visible on the result page.

Is this possble? OR something like a combination of DataTable and SQL Plugin

also I would like to mention that I purchased Smart Content and was searching for the CSV Table plugin but I cant find it, only the CSV2 plugin. I tried to enter the code from the demo page but it only shows the code on the webpage

_____

You can use combination of DataTable and SQL Table plugin in the following way:

```
{arijdatatable bPaginate="true"}
{arisqltable}
   {arisqltablecolumns}
     {arisqltablecolumn id="ID" alias="ID" className="idg"}
     {arisqltablecolumn id="TITLE" alias="Title" headerClassName="head"}
   {/arisqltablecolumns}
   {arisqltablequery}
     SELECT id AS ID,title AS TITLE
     FROM #__modules
   {/arisqltablequery}
{/arisqltable}
{/arijdatatable}
```

There are two CSV plugins - please see attached screenshot. The second plugin has been added recently - please make sure you have the latest version of component (the latest version can be downloaded in member area).

_____

Is it possible to only have a search box to search a given table and after a result page where you click a result that than show in a pop up maybe?(oh the searchable table should be hidden on result)

I cant find the plugin, on the demo site it says it should be in, I only downloaded this yesterday so it should be the latest version http://www.ari-soft.com/images/fbfiles/images/ari.jpg

edit: I just tried the combination, if I use it as you post it I get a list with the modules but if I change #__modules for agenten(this is how its in my sql) it doesnt show for some reason

_____

Probably you didn't notice the paging on the bottom: there are much more plugins than 10.

_____

unfortunatly I did check the picture for the other 2 pages

btw you dont have a solution for my other question? http://www.ari-soft.com/images/fbfiles/images/ari2.jpg

_____

Regarding search functionality you describe - this is custom logic and cannot be achieved by ARI Smart Content. This probably can require custom code.

Could you please go to Install/Uninstall -> Components in your Joomla! backend and verify that ARI Smart Content version is 1.4.3.
The second CSV plugin was added yesterday so we suspect probably you don't have the latest version.

If you can give us access to your Joomla! backend we can login and investigate. Please send us credentials by email.

Regards,
ARI Soft

_____

I had an older version thanks, didnt think about that cause I only downloaded it yesterday.

Gonna play with the component and see what I can create

thanks alot

_____

its a good component but sucks I wasted money on this cause it not gonna do what I hoped for

thanks any way

_____

There was no the functionality you want in description of extension. Since the extension does not suit your needs and

you've got only testing license for now we can provide you with refund if you would like.

Regards,
ARI Soft

_____

if you want to do that it would be great

it just not doing what I wanted but I keep in mind what it capable of if I have something that will work I purchase it again

regards
