
are there any detailed instructions on how to use?

Posted by darrentb - 2010/11/05 22:19

are there any detailed instructions on how to use this component?? I cant work out how to get it to work. I particularly want to use the accordion feature.

Hello,

Some tips about component usage can be found here. Each plugin page contains sample of usage and description all available plugin parameters. If you want to embed accordion into an article, place the following code into article:

```
{arijaccordion animated="bouncslide" width="200"}
{arijaccordionitem title="Title 1"}
  First section
{/arijaccordionitem}
{arijaccordionitem title="Title 2"}
  Second section
{/arijaccordionitem}
{arijaccordionitem title="Title 3"}
  Third section
{/arijaccordionitem}
{/arijaccordion}
```

If you use a WYSIWYG editor switch it to plain text mode because it can add extra HTML code which can break plugin code. If MooTools javascript library is used on your site, open "ARI JQuery UI Loader" plugin settings page and set "No conflict" parameter to "Yes" that avoid conflict between jQuery and MooTools libraries.

Could you provide link to page where we can see this problem? If it's private, you can provide it by email.

hi there,

here is one of the link.

<http://www.livingdownunder.net/where-to-live/queensland/sunshine-coast/maroochydore>

thanks

Could you provide temporary access to your Joomla! backend that we can investigate this issue because it seems accordion doesn't contain any items.

Try now please. The plugin showed nothing because "Use Joomla article" parameter was set to "Yes" in plugin settings and it means that by default the plugin will try to load articles into accordion. We have set this parameter to "No", but if you want use the plugin for showing article by default, you can set this parameter to "Yes" in plugin settings and add useJoomlaArticle="false" parameter to {arijaccordion} tag.
