
Applying Cupertino theme to JAccordion

Posted by krentzis - 2010/11/10 18:32

Hello,

my JAccordion works fine except that I dont know how to apply one of the themes shown at JAccordion demo page.

How I can change the theme to this code for example?

```
{arijaccordion animated="bounceslide" width="200" className="acord"}

{arijaccordionitem title="Title 1"}

    First section

{/arijaccordionitem}

{arijaccordionitem title="Title 2"}

    Second section

{/arijaccordionitem}

{arijaccordionitem title="Title 3"}

    Third section

{/arijaccordionitem}

{/arijaccordion}
```

thanks

Hello,

Open "Components -> ARI Smart Content -> Plugins -> ARI JQuery UI Loader" page on Joomla! backend and choose appropriate theme in "Default jQuery UI 1.5.2 theme" parameter.

Hello again,

i was wondering if I can use different theme for JAccordion.

for example I would like JAccordion to user Cupertino theme in one page and other theme on different or same page.

thanks

Kostas

Hello,

Currently only one jQuery UI Theme can be selected for the whole site.
