
problem with testing licence

Posted by krentzis - 2010/11/11 18:19

hello,

i think I applied the licence completely wrong.

my laptop with computer name kostas-pc was issued accidentally 2 testing licences. I added the licence with that name at ari smart content but when I use JAccordion for example I see only code.

Only if I access the site local site from an other PC on the network I can see JAccordion properly.

Can you please help.

thanks

Hello,

Could you specify what address you use in browser's address bar when the component doesn't work?

Regards,
ARI Soft

sorry my mistake.

i used localhost.

i thought it doesn't look the url but the name of the pc.

hence by changing the url from
`http://localhost/mysite.com/`
to
`http://kostas-pc/mysite.com`

it worked

thank you

now it works with localhost too
