
Table Won't work

Posted by satarielxx - 2009/01/19 10:47

i tried to install some table with CSV Table but it dont work

```
{aricsvtable file="data.csv"}
  {aricsvtablecolumns}
    {aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}
    {aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"}
  {/aricsvtablecolumns}
{/aricsvtable}
```

my result:

Handy;Unlock;Entbranden;Wert
6280;30;x;x

i only want a CSV Table with a search Button

any solutions or help for me :blink:

THX

According to your code some variant why the component doesn't work possible:

1) You use ';' as delimiter. ARI CSV Table plugin use ',' by default. For resolve this issue, please, specify delimiter in content

```
(
{aricsvtable file="data.csv" delimiter=";"}
.....
```

) or go to Components->ARI Smart Content->ARI CSV Table in backend of your site and set 'Delimiter' property to ';'.

2) data.csv doesn't exist.

Posted by satarielxx - 2009/01/19 12:06

ok now its ok, BUT how can i use csvtable IN arijdatatable???????

THX and WBR

```
{aricsvtable file="test1.csv" delimiter=";"}
  {aricsvtablecolumns}
    {aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}
    {aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"}
  {/aricsvtablecolumns}
{/aricsvtable}
```

```
{arijdatatable bPaginate="true"} column1 column2 column3 coolumn4
content1 content2 content3 content4
```

```
{/arijdatatable}
```

Re:Table Won't work

Posted by admin - 2009/01/19 12:15

Use the following syntax:

```
{arijdatatable bPaginate="true"}
{aricsvtable file="test1.csv" delimiter=";"}
{aricsvtablecolumns}
{aricsvtablecolumn id="ID" alias="ID" width="20%" className="idg"}
{aricsvtablecolumn id="NAME" alias="UserName" headerClassName="head"}
{/aricsvtablecolumns}
{/aricsvtable}
{/arijdatatable}
```

Re:Table Won't work

Posted by admin - 2009/01/19 12:16

You can use the following code:

```
{arijdatatable}
{aricsvtable file="test1.csv" delimiter=";"}
{/aricsvtable}
{/arijdatatable}
```

There is also usage example here (Example2).

ok thx, and i hope my last question:

how can i format table (font-size, table bgcolor..... CSS???)

and how can i set the fieldlength (its to small)

here a screenshot

<http://www.ari-soft.com/images/fbfiles/images/ss.JPG>

Can you say link where we can see it. If we can see layout of page with plugin then we can provide more effective solution for resolving your issue.

Re:Table Won't work

Re:Table Won't work

Posted by admin - 2009/01/19 13:41

It seems that problem with your template. If you view html source of page, you can see the following code:

... ARI JDataTable goes here ...

- didn't have width.

For resolving this issue you can add style 'width: 100%' for CSS class 'TABLE.contentpaneopen2' if it appropriate or wrap ARI JDataTable with " and set fixed width for " element.

Re:Table Won't work

Posted by satarielxx - 2009/01/19 14:07

thx dude, you're great B) B)

last question i hope; how can i make the rows in a different colour (and the font-style) or on which file i must use css....

THX and WBR

Re:Table Won't work

Posted by admin - 2009/01/19 14:20

Thanks for good words :) You can add the following CSS rule to your css file:

```
// for each even row
.dataTables_wrapper TABLE TR.even
{
}
```

```
// for each even odd
.dataTables_wrapper TABLE TR.odd
{
}
```

Now we are working on the next version of ARI Smart Content. It'll contain 'CSS Templates' where you can place your

CSS rules.
