
using the arisql plugin

Posted by gerald26373 - 2009/01/21 17:02

i am trying to use the sql plugin to list two fields from a table, but nothing is being displayed. The table has six fields. the name of the table is tbl_contest.

using the following code:

```
{arisqltable}
{arisqltablecolumns}
  {arisqltablecolumn id="Year" alias="Year" }
  {arisqltablecolumn id="Placing" alias="Placing" }
{/arisqltablecolumns}
{arisqltablequery}
SELECT Year AS Year,Placing AS Placing FROM tbl_contest
{/arisqltablequery}
{/arisqltable}
```
