

Remove Search

Posted by shamrockkllc - 2011/01/03 02:33

How can I remove the search box completely from ARI JDataTable?

Hello,

Add bFilter="false" parameter to "arijdatatable" tag. Code will look like:

```
{arijdatatable bFilter="false"}
```

```
column1
column2
column3
```

```
content1
content2
content3
```

```
content1
content2
content3
```

```
{/arijdatatable}
```

Regards,
ARI Soft
