Edit anchor on JTabView
Posted by DonGoiano - 2011/01/05 00:12

_____

Hello,

The anchor for Tabs are strange (for exemple, #jtabc_4d23b47dc41da). I can edit it?

Regards,
Diogo

Hello,

Currently the plugin doesn't provide this possibility, but you can submit feature request here and we will implement this ability in a future release.

_____

Hello,

Thanks for the reply. :)

I have another question: there is possible I create a link within the content that when I click change the active tab?

Regards,
Diogo
