error viewing in Pdf export

Posted by klaustillmann - 2011/01/09 12:35

_____

Hello together,

all my tables from csv docs and sql works fine.
However to do so, I've to use the "System - ARI Smart Content" plugin instead of the "ARI Smart Content" plugin to display complete jdatatable features (like filtering etc).

but

 i can't view any article it in pdf format.
When i press the pdf icon on content top, i can see all the code inside instead of the table i want?
The problem occurs during pdf exports, regardless if there is an ari table within the content or not.
However, if I disable "System - ARI Smart Content" plugin, pdf export works fine, but ari table where displayed without any jQuery UI layout, without filter and sorting function.

Is there any chance to solve that problem?

For example please visit my page www.sfg-bensheim.com

Regards

Klaus http://www.ari-soft.com/images/fbfiles/images/pic_1.png

_____

thanks for quick response.

Sorry to say that the pdf export still deliver only symbols as I posted in my last mail.

Again ARI JDataTable still not work with the "System - ARI Smart Content" plugin dissabled.
What ist the difference beetween "System - ARI Smart Content" and "ARI Smart Content" plugin?
What is need for ARI JDataTable to work within a standart article?

At the moment I've installed both pluggins, toggle for testing purpose beetween them, but as mentioned I'm not able to get ARI JDataTable work "only" with the "ARI Smart Content" plugin.

I would appreciate the "ARI Smart Content" plugin enabled, because in this case I've no problems with pdf export....

Hope we could solve the problem

Regards

 Klaus

  {arimootable} {arisqltable} {arisqltablecolumns} {arisqltablecolumn id="DisplayName"
alias="DisplayName" width="20%" className="idg"} {arisqltablecolumn id="Description"
alias="Description" headerClassName="head"} {/arisqltablecolumns} {arisqltablequery}
SELECT DisplayName,Description   FROM jos_arisc_plugin_params_def {/arisqltablequery}
{/arisqltable} {/arimootable}

can you send me the mail send to "klaustillmann"

thaks

_____

hi , the plugin for ari-smart content work fine, thanks

now, i need the same solution for Ari data tables and gchart is this possible???

in pdf I see
 {aridatatables moduleId="174"}

thanks

Ok, but... if ari smart content works, then ari data tables should work too, I Think, or not????

thanks

_____

GChart will not work in PDF document because it uses javascript for creating charts.

Regards,
ARI Soft
