ARIJDATATABLE default length 5 Hours, 15 Minutes ago Karma: 0
Hi,

I use ARIJDATATABLE and want to set the default length from 10 to 20 rows. How can I change this?

Michael

Hello,

We've added new parameter 'iDisplayLength'. It indicate number of rows to display on a single page when using pagination. Values: 10,25,50,100. You can download the latest version of ARI Smart Content in 'Member Area'.

Is it possible that you add the parameter all to the values, that for default the whole list is shown?

Hello,

We think about adding this feature in one of the following releases.
