
Default sorting of JDataTable

Posted by dsdipcomms - 2009/09/16 07:12

Hi there,

Just wondering if the next release could have some way to set the default sorting for a column, i.e. asc or desc?

For example, the following page:

www.dip.qld.gov.au/newsletters/local-government-bulletins.html

Basically, I'd like the first column to sort desc not asc as it currently shows - so that the latest bulletin is on top. The JTableSorter could be used but this lacks the search functionality of the JDataTable.

Thanks :)
