Decimal sorting for jDatatable.

Posted by thewineguy - 2009/09/27 20:37

_____

Would it be possible to add decimal sorting for numerical/currency values? I noticed other tables can do this but they do not have the jQuery templates or jDT functionality.

ex.

$1.00
$2.00
$32.00
$4.00

this is the current sorting. Would be great to sort for price lists searching instead....

Many thanks for a great component though!

Regards
MA
