
Rows instead of columns

Posted by RomanB - 2009/01/26 16:53

I needed a CSV table with following look (rows instead of columns). In what shape has to be CSV file?

```
> row1,content1a,content1b,content1c
> row2,content2a,content2b,content2c
> row3,content3a,content3b,content3c
```

Thaks in advance

Hello,

We are glad to announce that ARI Smart Content 1.5.0 is available. It contains improved version of ARI CSV Table. Now, you can do what you want with 'heading' and 'header' parameters.

Regards,
ARI Soft
